

Tristan Vincent C. Lemana

BSIT 4-A

PERSONAL MISSION STATEMENT

I am becoming a disciplined and purpose-driven individual who strives to grow both in skill and in character. As an IT student from Ateneo de Davao University, I aim to develop strong technical abilities while staying grounded in values that guide my decisions and actions.

What drives me is the desire to improve and to create something meaningful. I am motivated by challenges that push me to think critically and solve real-world problems. I want my work in technology to go beyond completing tasks, but to produce solutions that are useful, efficient, and relevant.

I choose to live by the values of integrity, discipline, accountability, and responsibility. I believe that success is not only about results, but about how those results are achieved. I want to be someone who can be trusted, who takes responsibility seriously, and who remains consistent even in difficult situations.

As an ADDU graduate, I am called to be a person for and with others. This means using my knowledge and skills not only for personal success, but also to contribute to the common good. I aim to apply what I learn in ways that are ethical, responsible, and beneficial to others.

Ultimately, I hope to become not only a competent IT professional, but also a person of purpose, someone who uses their abilities with integrity and contributes meaningfully to society.

PRAYER FOR MY FUTURE SELF

Lord,

As I continue moving forward, I ask for Your guidance in shaping the person I am becoming. Help me stay focused on my goals while remaining grounded in what truly matters.

Give me the strength to stay disciplined and consistent, especially when things become difficult or uncertain. Remind me that growth takes time, and that every challenge is part of becoming better.

Guide my decisions so that I choose what is right, not just what is easy. Help me stay true to my values and remain responsible in everything I do.

I pray that in the years ahead, I grow into someone who is not only skilled, but also ethical, dependable, and mindful of others. May I use what I have learned to contribute positively and to live a life with purpose.

Continue to guide me in becoming the person I am meant to be.

Amen.

10–20 YEAR PASSION PLAN

In the next 10 to 20 years, I see myself building a stable and meaningful career in the field of Information Technology. My goal is to become a competent and reliable professional who can solve problems, adapt to changes, and contribute to effective systems and solutions.

Short-Term Goals (1–5 Years)

- Graduate and secure a job in the IT industry
- Gain practical experience and strengthen my technical skills
- Continue learning through certifications and self-improvement
- Build discipline, consistency, and professionalism
- Apply my knowledge in real-world situations

Mid-Term Goals (5–10 Years)

- Develop expertise in a specific area within IT
- Take on more responsibility in projects or teams
- Contribute to meaningful and impactful projects
- Achieve financial stability and independence
- Maintain ethical practices in my work

Long-Term Goals (10–20 Years)

- Become highly skilled and experienced in my field
- Take on leadership roles or manage major projects
- Contribute to solutions that benefit society
- Maintain a balanced life with clear purpose and direction
- Continue living out values of integrity, responsibility, and service

INTEGRATION

My personal mission, prayer, and long-term plans are all connected by one goal: to become a person who combines competence with strong values. My career path is not separate from who I am, but an extension of it.

The skills I develop and the goals I pursue are guided by the formation I received from Ateneo de Davao University. This ensures that my future is not only focused on success, but also on responsibility, purpose, and contributing to the common good.
